EDUCATION

De La Salle Lipa — Lipa City, Batangas
BS Information Technology, Major in Information Security | *GWA: 3.38* | *Dean's Lister, AY 2023–2024* **Expected Graduation: June 2027**

- **1st Place – Best Capstone Project (InfoSec Track) & 1st Place – Best Group Presentation** — IT Colloquium '26–'27 (Oct 2026)
- **Top Student Awardee** — IT Elective 2: Security Planning, Implementation, and Audit (2026) · **NSTP Lingkod Awardee** — Community Service (2024)

EXPERIENCE

Security Operations Center (SOC) Lab Mentee | DysrupIT × De La Salle Lipa Partnership
Technology Stack: Security Onion, Sophos Central, Action1 RMM, FortiGate, pfSense, Wireshark, Kali Linux **2025 – Present**

- **Investigated and triaged** network and endpoint security alerts within Security Onion mapped to the MITRE ATT&CK framework, executing case management workflows to accelerate threat identification and incident analysis.
- **Executed endpoint patch deployments** using Action1 RMM, evaluated EDR and firewall policies across FortiGate and pfSense, and enforced host isolation and IP blocking to contain simulated security threats.
- **Analyzed suspicious email headers** using SPF, DKIM, and DMARC verification, validating security detection rules and response procedures through controlled phishing and attack simulations.

PROJECTS

Security Monitoring Solution – Tanauan City Hall MIS Office | Academic Capstone Project Lead (Team of 4)
Technology Stack: NIST CSF 2.0, MITRE ATT&CK, Security Onion, Elastic Stack, Python, Telegram Bot API **2025 – 2026**

- **Conducted** a security gap assessment for a city government unit, designing and deploying an integrated Security Onion network and endpoint monitoring architecture aligned with NIST CSF 2.0 and the Philippine NCSP 2023–2028.
- **Configured log ingestion** across pilot endpoints, indexing 9.7M+ security events, achieving 100% detection across 5 simulated attack scenarios, reducing alert delivery time to ~1.5 minutes, and tuning rules to limit false positives to ~10%.
- **Hardened server infrastructure** through MFA implementation, key-only SSH configuration, and secrets migration, raising the Lynis security audit score from 68 to 83 while remediating ISO/IEC 25010 and OWASP audit findings.
- **Co-authored** the SOC User Handbook, SLA, and BC/DR plans, integrating custom Telegram Bot API alerts and securing formal UAT approval and an official endorsement from the MIS Department Head.

Risk & Compliance Assessment Coursework | Academic Research & Security Audit (Team of 4)
Technology Stack: CIS Controls v8, NIST Framework, Quantitative Risk Assessment (SLE, ARO, ALE) **2025 – 2026**

- **Executed** a CIS Controls v8 security assessment on a campus network, performing quantitative risk analysis (SLE, ARO, ALE) and cost-benefit evaluations to deliver prioritized risk mitigation strategies.
- **Authored** a comprehensive threat intelligence report analyzing LockBit ransomware tactics, techniques, and procedures (TTPs), mapping attack vectors to defense-in-depth security controls.

Vulnerability Assessment & Remediation Lab | Practical Security Laboratory Exercise
Technology Stack: Nessus, OpenVAS, PowerShell, Active Directory, Group Policy (GPO) **2025**

- **Conducted** automated network vulnerability scans using Nessus and OpenVAS, identifying critical infrastructure exploits including MS17-010, MS08-067, and PetitPotam.
- **Remediated** identified system vulnerabilities by configuring Group Policy Objects (GPO), enforcing SMB signing via PowerShell scripts, and applying security patches across target systems.

SOC Incident Investigation Writeups – LetsDefend | Self-Directed Training
Technology Stack: LetsDefend Platform, MITRE ATT&CK, Tier-1 Incident Response, Threat Analysis **2025 – 2026**

- **Completed** 11 Tier-1 SOC incident investigations on LetsDefend (including CVE-2024-3400 and Lumma Stealer), analyzing log artifacts, mapping indicators to MITRE ATT&CK, and documenting structured incident investigation writeups.

LEADERSHIP EXPERIENCE

Junior Philippine Computer Society (JPCS) – DLSL Chapter
Project Head, Internal Affairs (IT) | *Previously 3rd Year IT Representative* **2025 – Present**

- **Coordinated** cross-functional student committees in organizing technical workshops, seminars, and competitions for 200+ IT students, boosting departmental engagement and technical skill building.
- **Authored** formal project concept papers, SWOT analyses, executive summaries, and narrative reports, securing organizational approvals and ensuring structured event planning.
- **Streamlined** project tracking and cross-committee documentation utilizing Google Workspace and Google Sheets, improving operational coordination and reporting workflows.

CERTIFICATIONS & TECHNICAL SKILLS

- **Certifications:** ISC2 Certified in Cybersecurity (CC) · Appkademiya Certified Cybersecurity Professional (CCP – 119/120) · Google Cybersecurity Certificate (In Progress)
- **Training & Credentials:** Fortinet Threat Landscape 3.0 · Cisco Intro to Cybersecurity · DICT Cybersecurity Trainings (2) · LetsDefend SOC Badges (6 Tier-1 Badges)
- **SIEM & Security Operations:** Security Onion, Elastic Stack, Wazuh, Sophos Central EDR, Wireshark, Kali Linux, Action1 RMM
- **Vulnerability & Network Security:** Nessus, OpenVAS, FortiGate, pfSense, Firewall Policy Review, Traffic Analysis, Incident Response
- **Frameworks & Risk Management:** NIST CSF 2.0, CIS Controls v8, ISO/IEC 25010, MITRE ATT&CK, NCSP 2023–2028, Quantitative Risk Assessment (ALE, cost-benefit)
- **Systems & Infrastructure:** Windows Server, Linux (Ubuntu/Debian), Active Directory, Group Policy (GPO), PowerShell, Python, Key-only SSH, MFA Hardening
- **Documentation & Tools:** SLA & BC/DR Technical Writing, SOC Handbooks, UAT Endorsements, Google Workspace, MS Office (Excel, Word, PowerPoint)
